CAREER OBJECTIVE

Results-driven Software Engineer fresher with hands-on experience in AWS data engineering, ETL pipeline development, and backend systems. Skilled in C++, Python, and cloud technologies, with a strong foundation in data structures, algorithms, and object-oriented design. Seeking a challenging role to deliver scalable technical solutions and drive organizational growth.

EDUCATION

Arya College of Engineering — B.Tech, Computer Science & Engineering | CGPA: 9.1 Aug 2023 – May 2027
Jaipur, RJ

DAV Public School — Senior Secondary, Science (PCM) | 76% 2017 – 2023
Muzaffarpur, Bihar

TECHNICAL SKILLS

Languages: C++ (STL, Memory Management, Complexity Analysis), C, Python
Cloud & Data Engineering: AWS (S3, EC2, RDS, Glue, Lambda, CloudWatch), ETL Pipelines, Data Warehousing, Data Modeling
Backend Development: Django, Flask, FastAPI, REST APIs, JWT Authentication, Microservices
AI & Machine Learning (Basics): Machine Learning Fundamentals, Scikit-learn, Basic Prompt Engineering
Databases: SQL (MySQL, PostgreSQL), MongoDB, Indexing, Query Optimization, Transactions
Frontend (Basic): HTML5, CSS3, React.js, Responsive Design
Tools & Practices: Git, GitHub, VS Code, Postman, Agile, Problem Solving, Statistical Modeling
CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

EXPERIENCE

AWS Data Engineer Intern | *Grras Solutions Pvt. Ltd., Jaipur (On-site)* May 30, 2026 – Jul 15, 2026

- Designed and implemented end-to-end ETL pipelines on AWS using Glue and Lambda, ingesting and transforming structured/unstructured data, reducing pipeline processing time by 35%.
- Leveraged AWS S3 for scalable object storage, EC2 for compute workloads, and RDS for relational database management, ensuring high availability and data integrity across production environments.
- Automated data ingestion workflows and monitored pipeline health via CloudWatch alerts and dashboards, improving data delivery SLAs by 25% across multiple business units.

Data Analytics Intern | *Codec Technologies, Jaipur (Remote)* Jun 2025 – Aug 2025

- Analyzed real-world datasets using Python (Pandas, NumPy) to build data cleaning and preprocessing pipelines, improving data quality and consistency across 5+ project datasets.
- Developed data visualizations and interpretation reports using Matplotlib and Seaborn, enabling stakeholders to identify trends and patterns 40% faster than manual review processes.

PROJECTS

Secure User Authentication System — *C++, OOP, File Handling* | **GitHub**

- Engineered a console-based C++ authentication system supporting account registration and login with persistent credential storage, maintaining 100% session continuity across application restarts.
- Applied OOP design principles and file I/O for reliable user data management, reducing unauthorized access scenarios by 95% through multi-layer input validation and structured credential retrieval.

Healthcare Predictive Analysis — *Python, Pandas, NumPy, Matplotlib, Logistic Regression* | **GitHub**

- Built a predictive analysis pipeline using Logistic Regression to forecast patient health outcomes; performed end-to-end feature engineering with Pandas and NumPy, improving model precision by 20%.
- Visualized healthcare trends and statistical distributions using Matplotlib and Seaborn, providing clear interpretation of model predictions and feature correlations for clinical decision support.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **400+ Data Structures & Algorithm problems** across **LeetCode, HackerRank, Coding Ninjas, and CodeChef**, demonstrating consistent and disciplined competitive programming practice.
- Achieved **4-Star rating in C++ and Python** on HackerRank, ranking in the **top percentile** of global proficiency assessments across both languages.
- **NPTEL Certified — Programming in Modern C++**: Demonstrated advanced proficiency in modern C++ standards including **templates, STL, move semantics**, and best practices.
- **NPTEL Certified — Problem Solving Through Programming in C**: Validated strong foundational programming skills, algorithmic thinking, and structured problem-solving using C.

HOBBIES

Reading Books (Technology, Self-Development) | Listening to Music | Competitive Programming | Exploring New Technologies
